Outreach

Women in Mechanical Engineering Tea (WeMET) 2022 – Present
I founded and sponsor this program at Virginia Tech. WeMET provides an opportunity for female graduate students across different research groups to get to know each other, socialize, discuss the highs and lows of graduate school, and foster diversity. Participants meet monthly and chat over tea.

Women's Preview Weekend 2021 – Present
I host lab visits for this yearly event. During Women's Preview Weekend prospective students who have been offered admission to Virginia Tech visit the campus and learn about ongoing research.

Engineering Open House 2022 – Present
I give talks on robotics and machine learning at this yearly event. Engineering Open House enables high school students and their families to learn more about engineering at Virginia Tech.

RoboGrinder 2023 – Present
I am the faculty advisor for this Virginia Tech student team. The group of around 50 undergraduates from multiple departments designs, builds, and programs a robot for national and international competitions

Stanford AI Mentor 2019 – 2020
I mentored in this SAIL program, where we connected underrepresented minorities and female undergraduate students interested in AI with Ph.D. students to meet monthly and discuss research and career choices.

AI4ALL 2019 – 2020
I shared our lab's research in human-robot interaction with female high-schools students participating in AI4ALL, and lectured on how we write code to control robots at Stanford University.

TOMODACHI-STEM 2018
I mentored a female undergraduate student from Japan throughout a mechatronics research project as a part of this Rice University program meant to provide an introduction to higher education and opportunities for cultural engagement.
